

WA440 PREGNANCY DUE DATE

KEES is currently using the month and day when calculating the length of the pregnancy period. Because of this KEES might not consider an individual to be pregnant for the first month of their pregnancy.

Example: Application received in 07/2015 reports pregnancy with an Estimated Due Date of 04/15/2016. When EDBC is run for 07/2015 KEES is determining the estimated month of conception correctly as 07/2015 however it is using 07/15/15 and comparing that to the benefit month of 07/01/15 because of this it is not allowing pregnancy coverage for the first month of the pregnancy.

In this situation the following workaround should be used.

This workaround assumes that user has navigated to the Pregnancy Detail page for the appropriate Pregnancy record.

Step 1: Update the Due Date to be the first day of the Estimated Due Date Month. In the above example 04/15/2016 would be changed to 04/01/2016. Save the change.

Step 2: Run EDBC for the first benefit month of the pregnancy and Accept and Save the results.

Step 3: Update the Due Date and change it back to the Reported Estimated Due Date. In the above example the date would be changed back to 04/15/2016. Save the change.
