GOVERNOR JEFF COLYER, M.D.  
JEFF ANDERSEN, SECRETARY

## Service Locations

In order to align with Medicare practices and national industry standards, as well as, Kansas Modular Medicaid System (KMMS) requirements, facility and group providers and required to enroll each physical service location with KMAP.

- A **physical service location** is defined as a unique registered business address under the provider's TIN, including locations with separate NPI's. The service address should be used on claims in the billing provider loop.

Providers are encouraged to obtain a separate NPI for each service location.

*If not, each service location must have a different registered business address.*

*This requirement is retroactive to March 1, 2018.*

- Each provider type will still require a separate enrollment per service location.
- Each service location is required to have an active KMAP ID in order to contract with a Managed Care Organization (MCO).
- Group providers will require 1 enrollment.
  - Providers will then affiliate to their respective groups/service locations.
